Media Art Worlds – a conference on hybrid economies of digital art

Saturday March 24, 2018 14:00-18:00

Korjaamo Culture Factory, Töölönkatu 51 B, Helsinki

The production and presentation of media art takes place in a hybrid economy involving diverse technical and social platforms as well as a variety of institutional contexts – art museums, film festivals, science & technology centres, universities and media art organisations. It can be said that media art's potential for both digital innovations and critical interventions arises from a practice which cuts across established categories of culture and technology. However this activity can also result in a precarious position for the artist, who may feel trapped between the worlds. In this conference we hope to share insights on how to develop projects, reach audiences and sustain practices across the many media art worlds.

The conference is organised by the European Media Art Platform EMAP, co-funded by the Creative Europe Programme of the European Union, and hosted by m-cult with support from FRAME and the Finnish Institute in London.
